

# THE 49 LAYERS OF HAPPINESS

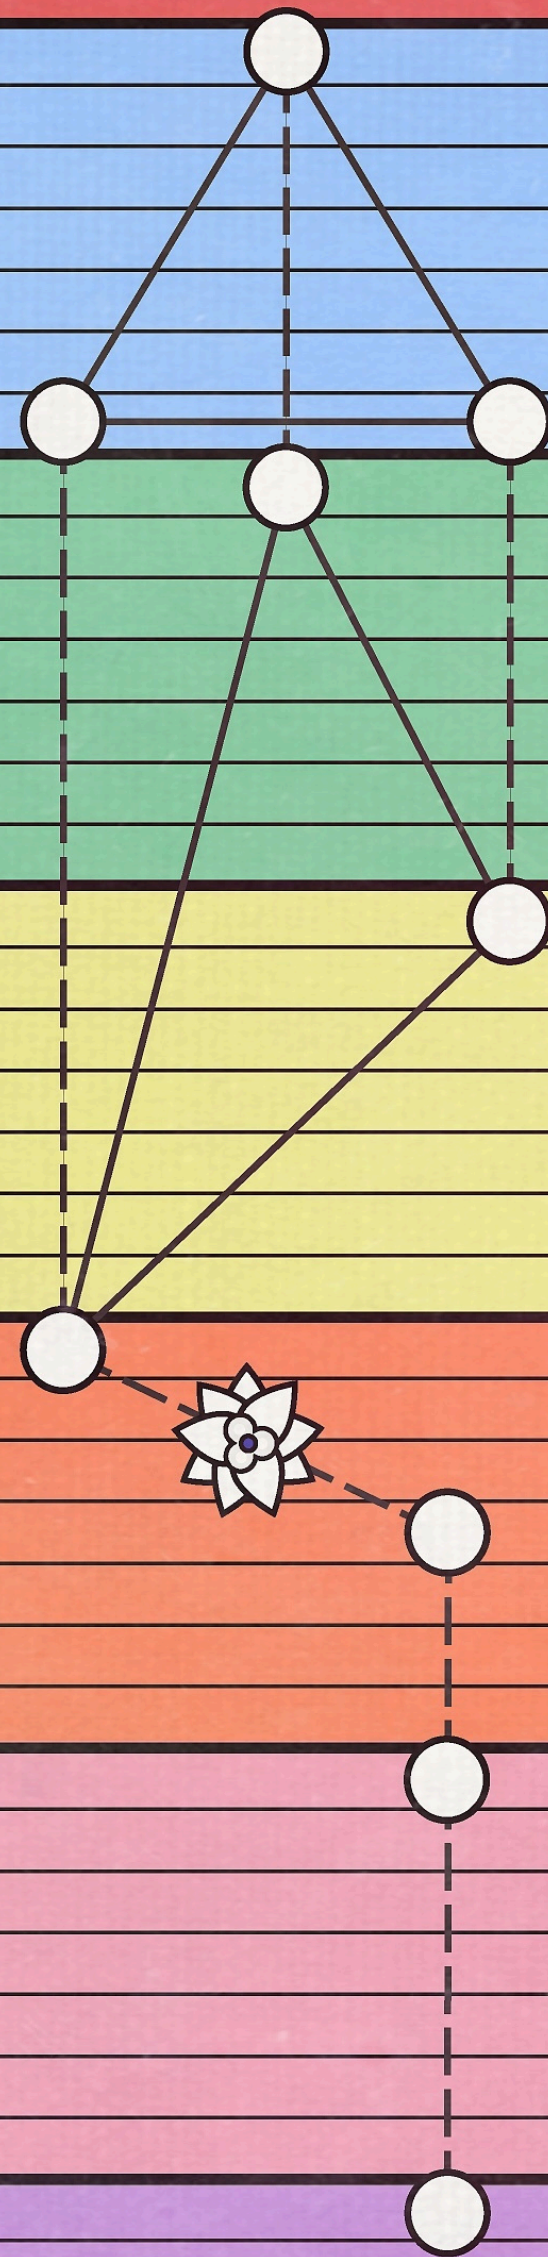

The chart of the energetic constitution of the human being has been used by esotericists for more than a century to map out the descent of spirit into matter and, conversely, the ascent of consciousness through matter into spirit. Though the traditional diagram looks complicated and abstract (we've kindly simplified the image here), we live this map's terrain every moment of our waking lives... and beyond!

This course supports:

- developing a reverence for the process of personal evolution.
- understanding the pathway of spiritual growth.
- accessing universal truths about the construct and potential of the human being.
- the exploration of the soul - its structure, purpose, and function as the arbiter of enlightenment.
- inspiration for accessing the upper planes of consciousness.

One primary goal of Ageless Wisdom teachings is to support human evolution; largely, this is dependent upon the integration of the personality and the soul. The chart we'll be working with, "The Seven Planes of Our Solar System, The Constitution of Man" (the name given by The Tibetan), is the supreme roadmap for this integration process.
